

Westend Carrée

Frankfurt am Main, 2007 - 2008
؟؟؟؟

Where there was once a confusing conglomerate of buildings, today there is a light-flooded, open entrance space, creating a pure and minimal environment. What now appears effortless and simple is the result of determined work; the main focus in converting the Westend-Carrée in the heart of Frankfurt was on creating spatial clarity and thus enabling easy orientation. The conversion not only lives up to its up-market location but also to the high expectations of the tenants.
